## ***Department of Pathology***

---

Michael Shelanski, M.D., PH.D.

Delafield Professor of Pathology and Chair

The Department of Pathology is pleased to be able to offer its full-range of diagnostic procedures to physicians and hospitals outside of the Columbia University Medical Center. Our pathologists are leaders in research and diagnostics in a variety of areas including, among others, diseases of the nervous system, kidney, hematopoetic system, prostate, lung, heart, female reproductive tract and gastrointestinal system including the liver and pancreas.

We offer personal consultative services on complex cases to supplement the usual pathology report. Our molecular diagnostic laboratory offers an extensive menu of DNA based diagnostics and the Laboratory Hematology service provides expertise in complex issues of hemotherapy and transplantation.

We are aware that dealing with an academic center can appear complex and we work actively with clients to establish collection, billing and reporting solutions that allow a smooth integration of our services with their practice.

Columbia University Pathologists was formed by the faculty of the Department of Pathology at Columbia University Medical Center (CUMC) to accommodate outside physicians who want to take advantage of the Departments expertise:

- World-renowned Pathologists
- Accuracy in Reporting
- Unmatched Scientific Research
- Direct MD-Pathologist Consults
- State-of-the-Art Equipment
- Rapid Turnaround
- Customized Requisitions
- Digital Color Image of Abnormal Specimens
- Billing & Insurance Support
- Supplies for Specimen Collection
- Paperless Reporting Options

Columbia University Pathologists is a leading provider of testing and consultation in anatomic pathology and laboratory medicine. Our fully accredited laboratories are staffed by nationally and internationally recognized pathologists with subspecialty expertise in all areas of anatomic and clinical pathology. Our clinical services complete over 4 million procedures per year. We have more than 50 attending physicians and doctoral level scientists and a staff of over 400 individuals dedicated to delivering timely and reliable service to all patients and healthcare providers.
